The Psychology of Power-

Jaap van Ginneken

2014-11-24 This book tests the disquieting hypothesis that our most powerful leaders acquire strange quirks at the top, making them take unnecessary risks. The author scrutinizes some of the best-known politicians of the largest western or G6 nations over the last half century, when they approached or reached the highest executive office, such as Berlusconi, Bush, Clinton, Kennedy, Reagan, Thatcher and others. All gave in to a slightly amended version of the seven temptations or mortal sins: Lust or sexual obsession, Gluttony or substance abuse, Greed or hidden corruption, Wrath or power abuse, Denial of mortal illness, Denial of Folly or mental disease, and Pride or over-confidence. Well documented with references to primary sources in four different languages, this study examines the psychological forces tugging at the top level

of political leadership.

The Origins and Development of the English Language-

1964

Visiting Mrs. Nabokov-

Martin Amis 2011-01-26 To this tantalizing nonfiction collection Martin Amis brings the same megawatt wit, wickedly acute perception, and ebullient wordplay that characterize his novels. He encompasses the full range of contemporary politics and culture (high and low) while also traveling to China for soccer with Elton John and to London's darts-crazy pubs in search of the perfect throw. Throughout, he offers razor-sharp takes on such subjects as: American politics: "If history is a nightmare from which we are trying to awake, then the Reagan era can be seen as an eight-year blackout. Numb, pale, unhealthily dreamless: eight years of Do Not Disturb." Chess: "Nowhere in sport, perhaps in human activity, is the gap between the tryer and

the expert so astronomical....
My chances of a chess
brilliancy are the 'chances' of
a lab chimp and a type writer
producing King Lear."

Britain Since 1945-David Childs 1979

Jack and Bobby-Leo McKinstry 2009-06-16 The history of modern British football can largely be written through the stories of Jack and Bobby Charlton. Both were in the World Cup winning team of '66, and each has remained deeply involved in the game ever since. The book traces the parallel lives of Jack and Bobby Charlton, following them from their schooldays through to the present day. The brothers both played prominent roles in the finest hour of English football, the 1966 World Cup triumph. Each played for the dominant club of their era, and summed up the style of their respective teams. Bobby was at Manchester Utd during their glory days under Sir Matt Busby. He survived the Munich air crash and went on to become a fast, graceful attacker who set grounds alight with his power, speed and athleticism in a team that played free-flowing, attacking football. Jack came to professional football late, working in a coal mine before

Leeds signed him. Don Revie's Leeds side was renowned for its uncompromising and physical style, and Jack was himself a tough, durable and aggressive defender, who once caused uproar by admitting he had a 'black book' with a list of footballing enemies who he would target on the pitch. The two retired from football in the same year, and since, the contrast between them has been marked. Bobby's forays into management at Wigan and Preston were distinguished only by their brevity, while 'Big Jack' took the Republic of Ireland team to an unprecedented level of success, reaching the quarter finals of the World Cup in 1994. Bobby has been a key figure in the ongoing success of Manchester United over the past decade, working on recruiting players and as an FA diplomat. But, despite their continued successes, the relationship between the two has been strained, sometimes barely even polite, and the book will investigate the reasons for this, including in-depth interviews with many of those the two have been in contact with over the years.
