Stages to Saturn-Roger E. Bilstein 1999-08 A classic study of the development of the Saturn launch vehicle that took Americans to the Moon in the 1960s. This Saturn rocket was developed as a means of accomplishing President Kennedy's 1961 commitment for the U.S. to reach the Moon before the end of the decade. This book not only tells the important story of the development of the Saturn rocket, and the people who designed and built it, but also recounts the stirring exploits of its operational life from orbital missions around Earth testing Apollo equipment to the Moon and back. Essential reading for anyone seeking to understand the development of space flight in America. Black and white photos.

Principles of Soil and Plant Water Relations-M.B. Kirkham 2014-04-21 Principles of Soil and Plant Water Relations, 2e describes the principles of water relations within soils, followed by the uptake of water and its subsequent movement throughout and from the plant body. This is presented as a progressive series of physical and biological interrelations, even though each topic is treated in detail on its own. The book also describes equipment used to measure water in the soil-plant-atmosphere system. At the end of each chapter is a biography of a scientist whose principles are discussed in the chapter. In addition to new information on the concept of celestial time, this new edition also includes new chapters on methods to determine sap flow in plants dual-probe heat-pulse technique to monitor water in the root zone. Provides the necessary understanding to address advancing problems in water availability for meeting ecological requirements at local, regional and global scales Covers plant anatomy: an essential component to understanding soil and plant water relations

Vertical-Stephen Graham 2016-11-08 A revolutionary reimagining of the cities we live in, the air above us, and what goes on in the earth beneath our feet Today we live in a world that can no longer be read as a two-dimensional map, but must now be understood as a series of vertical strata that reach from the satellites that encircle our planet to the tunnels deep within the ground. In Vertical, Stephen Graham rewrites the city at every level: how the geography of inequality, politics, and identity is determined in terms of above and below. Starting at the edge of earth's atmosphere and, in a series of riveting studies, descending through each layer, Graham explores the world of drones, the city from the viewpoint of an aerial bomber, the design of sidewalks and the hidden depths of underground bunkers. He asks: why was Dubai built to be seen from Google Earth? How do the super-rich in São Paulo live in their penthouses far above the street? Why do London billionaires build vast subterranean basements? And how do the technology of elevators and subversive urban explorers shape life on the surface and subsurface of the earth? Vertical will make you look at the world around you anew: this is a revolution in understanding your place in the world.

EPA 608 Study Guide-Hvac Training 101 2019-12-06 HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Social Identity-Richard Jenkins 2008-06-03 This third edition builds on the international success of previous editions, offering an easy access critical introduction to social science theories of identity, for advanced undergraduates and postgraduates. All of the previous chapters have been updated and extra material has been added where relevant, for example, on globalization. Two new chapters have been added; one addresses the debate about whether identity matters, discussing, for example, Brubaker; the second reviews the postmodern

approach to identity. The text is informed by relevant topical examples throughout and, as with earlier editions, the emphasis is on sociology, anthropology and social psychology; on the interplay between relationships of similarity and difference; on interaction; on the categorization of others as well as self-identification; and on power, institutions and organizations.

Language Shattered-Maghiel van Crevel 1996 Language Shattered is both a history of poetry from the People's Republic of China and a case study of the oeuvre of a leading Chinese poet. After the stifling orthodoxy of the 1950s and early 1960s, the terror of the Cultural Revolution (1966-1976) brought official Chinese literature to a total standstill. At the same time, disillusioned youths were more or less accidentally exposed to a varied body of foreign literature and began writing underground poetry. In the 1980s this poetry scene, now above ground, became one of pluriformity and proliferation in both official and unofficial circuits. The brutal suppression of the 1989 Protest Movement gave it an exile offshoot. The historical overview in Part I of this book is complemented in Part II by a discussion of Duoduo's poetry. Duoduo's career as a poet reflects the vicissitudes of Chinese Experimental poetry - and his beautiful, headstrong poems merit attention in themselves. They show that Chinese poetry is not just of interest as a chronicle of Chinese politics, but as literature in its own right.

Twelve Years A Slave (Illustrated)-Solomon Northup 2014-08-22 Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

After the Dresden Bombing-A. Fuchs 2011-11-16 Anne Fuchs traces the aftermath of the Dresden bombing in the collective imagination from 1945 to today. As a case study of an event that gained local, national and global iconicity, the book investigates the role of photography, fine art, architecture, literature and film in dialogue with the changing German socio-political landscape.

Architecture on the Borderline-Anoma Pieris 2019-06-25 Architecture on the Borderline interrogates space and territory in a turbulent present where nation-state borders are porous to a few but impermeable to many. It asks how these uneven and conflicted social realities are embodied in the physical and material conditions imagined, produced or experienced through architecture and urbanism. Drawing on historical, global examples, this rich collection of essays illustrates how empires, nations and cities expand their frontiers and contest boundaries, but equally how borderline identities of people and places influence or expose these processes. Empirical chapters covering Central Asia, the Asia Pacific region, the American continent, Europe and the Middle East offer multiple critical insights into the ways in which our spatial imagination is contingent on 'border-thinking'; on the ways of being and navigating frontiers, boundaries and margins, the three themes used to organise their content. The underlying premise of the book is that sensitisation to border conditions can alter our understanding of the static physical spaces that service political or cultural ideologies, and that the view from the periphery opens up new ways of understanding sovereignty. In exploring these various spaces and their transformative subjectivities, this book also reveals the unrelenting precarity of contesting and living on the margins, and related spaces and discourses that are neglected or suppressed.

Rubens & Brueghel-Anne T. Woollett 2006 Truly collaborative paintings, that is, not simply mechanical but also conceptual co-productions, are rare in the history of art. This gorgeously illustrated catalogue explores just such an extraordinary partnership between Antwerp's most eminent painters of the early seventeenth century, Peter Paul Rubens (1577-1640) and Jan Brueghel the Elder (1568-1625). Rubens and Brueghel executed approximately twenty-five works together between around 1597 and Brueghel's death in 1625. Highly prized and sought after by collectors throughout Europe, the collaborative works of Rubens and Brueghel were distinguished by an extremely high level of quality, further enhanced by the status of the artists themselves. Published to coincide with an exhibition at the Getty Museum to be held July 5 to September 24, 2006, the catalogue features twenty-six color plates of such Rubens/Brueghel paintings as The Return from War, The Feast of Acheloi's, and Madonna and Child in a Garland of Flowers, along with Rubens and Brueghel's collaborations with important contemporaries such as Frans Snyders and Hendrick van Balen. This is the first such publication to fully address and reproduce these works in depth.

Engineering and Chemical Thermodynamics-Milo D. Koretsky 2012-12-17 Chemical engineers face the challenge of learning the difficult concept and application of entropy and the 2nd Law of Thermodynamics. By following a visual approach and offering qualitative discussions of the role of molecular interactions, Koretsky helps them understand and visualize thermodynamics. Highlighted examples show how the material is applied in the real world. Expanded coverage includes biological content and examples, the Equation of State approach for both liquid and vapor phases in VLE, and the practical side of the 2nd Law. Engineers will then be able to use this resource as the basis for more advanced concepts.

Paul-Gerd Ludemann New Testament scholar Gerd Lüdemann continues his exploration of the life and teachings of Paul in this groundbreaking monograph, which synthesizes the research of his four previous books on Christianity's leading apostle. As the subtitle of the present work makes clear, Lüdemann comes to the conclusion that Paul should be considered not only Christianity's most influential proselytizer but in truth deserves the title of founder of the religion that ostensibly originated with Jesus of Nazareth. Though other scholars have previously made the point that Paul's interpretation of the Christian message actually obscured the original teachings of Jesus, Lüdemann goes further. His painstaking historical research shows that Paul created the major tenets of the Christianity we know today and that his theology - an original synthesis of Hebrew and Greek belief systems - differs significantly from what we now know the historical Jesus to have preached. Based on a life-changing vision of the risen Christ, Paul naturally made his belief in the resurrection of the crucified Jesus the centerpiece of his interpretation of this new religion. But Lüdemann contends that however sincerely motivated he was, in the final analysis we must judge Paul's belief as self-deception. Paul never knew Jesus and he had only a passing acquaintance and an often-strained relationship with Jesus' apostles. As a result, he was not in a position to accurately represent Jesus' teachings. Through the accidents of history and his dynamic personality, his evangelizing efforts to the non-Jewish population of the Roman Empire succeeded, whereas the mission of other leading apostles (for example, Peter and James) to a mainly Jewish audience failed. Thus, Paul's version of Christianity, not Jesus', captured the public imagination and eventually became the dominant religion of the West. In another book, Lüdemann has called this historical accident The Great Deception. Here he shows that the deception began as self-deception within the deeply conflicted personality of Paul of Tarsus, the former Pharisee and zealous persecutor of the fledgling Christian sect whose dramatic conversion on the road to Damascus transformed him into its greatest promoter. This brilliant exegesis, based on twenty-five years of research, by a leading New Testament scholar with an unwavering commitment to historical accuracy presents a message rarely heard from any pulpit but one that churches can no longer honestly ignore. Gerd Lüdemann is a professor of the history and literature of early Christianity at the University of Göttingen, Germany. Professor Lüdemann's published conclusions about Christianity aroused great controversy in his native Germany, where the Confederation of Protestant Churches in Lower Saxony demanded his immediate dismissal from the theological faculty of his university. Despite this threat to his academic freedom, he has retained his post at the university, although the chair he holds was renamed to disassociate him from the training program of German pastors. Lüdemann is also the author of Jesus After 2000 Years, Paul: The Founder of Christianity, and The Resurrection of Christ: A Historical Inquiry.

Winning Your Election the Wellstone Way-Jeff Blodgett 2008 As the 2008 presidential race dominates political discussion and media coverage worldwide, thousands of lesser-known local contests are being hard-fought in our neighborhoods, cities, and states. Winning Your Election the Wellstone Way is based on the work of Wellstone Action, a leading-edge progressive training center that has instructed thousands of political activists, campaign managers, and volunteers, of whom more than two hundred have gone on to run for office and win. Jeff Blodgett and Bill Lofy analyze the crucial lessons learned from many successful (and several losing) campaigns and demystifies what it takes to run for and win a political seat.

Hall of Smoke-H.M. Long 2021-01-19 Epic fantasy featuring warrior priestesses, and fickle gods at war, for readers of Brian Staveley's Chronicles of the Unhewn Throne. IEpic fantasy featuring warrior priestesses and fickle gods at war, for readers of Brian Staveley's Chronicles of the Unhewn Throne. Hessa is an Eangi: a warrior priestess of the Goddess of War, with the power to turn an enemy's bones to dust with a scream. Banished for disobeying her goddess's command to murder a traveller, she prays for forgiveness alone on a mountainside. While she is gone, raiders raze her village and obliterate the Eangi priesthood. Grieving and alone, Hessa - the last Eangi - must find the traveller and atone for her weakness and secure her place with her loved ones in the High Halls. As clans from the north and legionaries from the south tear through her homeland, slaughtering everyone in their path Hessa strives to win back her goddess' favour. Beset by zealot soldiers, deceitful gods, and newly-awakened demons at every turn, Hessa burns her path towards redemption and revenge. But her journey reveals a harrowing truth: the gods are dying and the High Halls of the afterlife are fading. Soon Hessa's trust in her goddess weakens with every unheeded prayer. Thrust into a battle between the gods of the Old World and the New, Hessa realizes there is far more on the line than securing a life beyond her own death. Bigger, older powers slumber beneath the surface of her world. And they're about to wake up.

Oddkins-Dean Koontz 2012-09-04 The #1 New York Times–bestselling author's visually stunning story about a magical band of living toys who learn to overcome their fears. Toymaker Isaac Bodkins created the Oddkins, a group of living toys, for very special children who face difficulties in life and need true friends. There's Amos, the brave stuffed bear; Skippy, the rabbit who dreams of being a superstar; Butterscotch, the gentle, floppy-eared pup; Burl the elephant; the wise and scholarly Gibbons; and Patch the cat. The Oddkins are given to children to inspire, support, and love them, especially during times of adversity. Only now, the toys themselves are the ones who need help. Before he dies, Mr. Bodkins delivers a dire warning to Amos the bear: Watch out for an evil toymaker and his dangerous creations! Locked up in the dark sub-basement, another group of toys is climbing out of boxes and crates and coming to life as well. These bad toys—like Rex and Lizzie, the puppets with no strings; Gear, the vicious robot; and Stinger, the horrid buzzing bumblebee with his knife-sharp stinger—were made to hurt children, not help them. Leering, laughing, and deadly, they are let loose into the world by a terrifying force. Frightening as it may be, the Oddkins must go on a journey to find Colleen Shannon, Mr. Bodkins's chosen successor as a life-giving toymaker and the only person who can save them. The stormy night is perilous and the Oddkins face a danger that threatens not only their magic . . . but the magic in us all.

Corrosion in Systems for Storage and Transportation of Petroleum Products and Biofuels-Alec Groysman 2014-02-17 This book treats corrosion as it occurs and affects processes in real-world situations, and thus points the way to practical solutions. Topics described include the conditions in which petroleum products are corrosive to metals; corrosion mechanisms of petroleum products; which parts of storage tanks containing crude oils and petroleum products undergo corrosion; dependence of corrosion in tanks on type of petroleum products; aggressiveness of petroleum products to polymeric material; how microorganisms take part in corrosion of tanks and pipes containing petroleum products; which corrosion monitoring methods are used in systems for storage and transportation of petroleum products; what corrosion control measures should be chosen; how to choose coatings for inner and outer surfaces of tanks containing petroleum products; and how different additives (oxygenates, aromatic solvents) to petroleum products and biofuels influence metallic and polymeric materials. The book is of interest to corrosion engineers, materials engineers, oil and gas engineers, petroleum engineers, chemists, chemical engineers, mechanical engineers, failure analysts, scientists, and students, designers of tanks, pipelines and other systems for storage and transportation fuels, technicians.
