**Stages to Saturn**-Roger E. Bilstein 1999-08 A classic study of the development of the Saturn launch vehicle that took Americans to the Moon in the 1960s. This Saturn rocket was developed as a means of accomplishing President Kennedy's 1961 commitment for the U.S. to reach the Moon before the end of the decade. This book not only tells the important story of the development of the Saturn rocket, and the people who designed and built it, but also recounts the stirring exploits of its operational life from orbital missions around Earth testing Apollo equipment to the Moon and back. Essential reading for anyone seeking to understand the development of space flight in America. Black and white photos.

**The Rise of Nuclear Fear**-Spencer R. Weart 2012-04-02 After a tsunami destroyed the cooling system at Japan's Fukushima Nuclear Power Plant, triggering a meltdown, protesters around the world challenged the use of nuclear power. Germany announced it would close its plants by 2022. Although the ills of fossil fuels are better understood than ever, the threat of climate change has never aroused the same visceral dread or swift action. Spencer Weart dissects this paradox, demonstrating that a powerful web of images surrounding nuclear energy holds us captive, allowing fear, rather than facts, to drive our thinking and public policy. Building on his classic, Nuclear Fear, Weart follows nuclear imagery from its origins in the symbolism of medieval alchemy to its appearance in film and fiction. Long before nuclear fission was discovered, fantasies of the destroyed planet, the transforming ray, and the white city of the future took root in the popular imagination. At the turn of the twentieth century when limited facts about radioactivity became known, they produced a blurred picture upon which scientists and the public projected their hopes and fears. These fears were magnified during the Cold War, when mushroom clouds no longer needed to be imagined; they appeared on the evening news. Weart examines nuclear anxiety in sources as diverse as Alain Resnais's film Hiroshima Mon Amour, Cormac McCarthy's novel The Road, and the television show The Simpsons. Recognizing how much we remain in thrall to these setpieces of the imagination, Weart hopes, will help us resist manipulation from both sides of the nuclear debate.

**Principles of Soil and Plant Water Relations**-M.B. Kirkham 2014-04-21 Principles of Soil and Plant Water Relations, 2e describes the principles of water relations within soils, followed by the uptake of water and its subsequent movement throughout and from the plant body. This is presented as a progressive series of physical and biological interrelations, even though each topic is treated in detail on its own. The book also describes equipment used to measure water in the soil-plant-atmosphere system. At the end of each chapter is a biography of a scientist whose principles are discussed in the chapter. In addition to new information on the concept of celestial time, this new edition also includes new chapters on methods to determine sap flow in plants dual-probe heat-pulse technique to monitor water in the root zone. Provides the necessary understanding to address advancing problems in water availability for meeting ecological requirements at local, regional and global scales Covers plant anatomy: an essential component to understanding soil and plant water relations

**EPA 608 Study Guide**-Hvac Training 101 2019-12-06 HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

**Vertical**-Stephen Graham 2016-11-08 A revolutionary reimagining of the cities we live in, the air above us, and what goes on in the earth beneath our feet Today we live in a world that can no longer be read as a two-dimensional map, but must now be understood as a series of vertical strata that reach from the satellites that encircle our planet to the tunnels deep within the ground. In Vertical, Stephen Graham rewrites the city at every level: how the geography of inequality, politics, and identity is determined in terms of above and below. Starting at the edge of earth's atmosphere and, in a series of riveting studies, descending through each layer, Graham explores the world of drones, the city from the viewpoint of an aerial bomber, the design of sidewalks and the hidden depths of underground bunkers. He asks: why was Dubai built to be seen from Google Earth? How do the super-rich in São Paulo live in their penthouses far above the street? Why do London billionaires build vast subterranean basements? And how do the technology of elevators and subversive urban explorers shape life on the surface and subsurface of the earth? Vertical will make you look at the world around you anew: this is a revolution in understanding your place in the world.

**Developing Story Ideas**-Michael Rabiger 2016-07-01 The vast majority of screenplay and writing books that focus on story development have little to say about the initial concept that inspired the piece. Developing Story Ideas: The Power and Purpose of Storytelling, Third Edition provides writers with ideational tools and resources to generate a wide variety of stories in a broad range of forms. Celebrated filmmaker and author Michael Rabiger demonstrates how to observe situations and themes in the writer's own life experience, and use these as the basis for original storytelling. This new edition has been updated with chapters on adaptation, improvisation, and cast collaboration's roles in story construction, as well as a companion website featuring further projects, class assignments, instructor resources, and more. Gain the practical tools and resources you need to spark your creativity and generate a wide variety of stories in a broad range of forms, including screenplays, documentaries, novels, short stories, and plays Through hands-on, step-by-step exercises and group and individual assignments, learn to use situations and themes from your own life experience, dreams, myth, and the news as the basis for character-driven storytelling; harness methods of screenplay format, dialogue, plot structure, and character development that will allow your stories to reach their fullest potential

**Social Identity**-Richard Jenkins 2008-06-03 This third edition builds on the international success of previous editions, offering an easy access critical introduction to social science theories of identity, for advanced undergraduates and postgraduates. All of the previous chapters have been updated and extra material has been added where relevant, for example, on globalization. Two new chapters have been added; one addresses the debate about whether identity matters, discussing, for example, Brubaker; the second reviews the postmodern approach to identity. The text is informed by relevant topical examples throughout and, as with earlier editions, the emphasis is on sociology, anthropology and social psychology; on the interplay between relationships of similarity and difference; on interaction; on the categorization of others as well as self-identification; and on power, institutions and organizations.

**Language Shattered**-Maghiel van Crevel 1996 Language Shattered is both a history of poetry from the People's Republic of China and a case study of the oeuvre of a leading Chinese poet. After the stifling orthodoxy of the 1950s and early 1960s, the terror of the Cultural Revolution (1966-1976) brought official Chinese literature to a total standstill. At the same time, disillusioned youths were more or less accidentally exposed to a varied body of foreign literature and began writing underground poetry. In the 1980s this poetry scene, now above ground, became one of pluriformity and proliferation in both official and unofficial circuits. The brutal suppression of the 1989 Protest Movement gave it an exile offshoot. The historical overview in Part I of this book is complemented in Part II by a discussion of Duoduo's poetry. Duoduo's career as a poet reflects the vicissitudes of Chinese Experimental poetry - and his beautiful, headstrong poems merit attention in themselves. They show that Chinese poetry is not just of interest as a chronicle of Chinese politics, but as literature in its own right.

**Biomechanical Spectrum of Human Sport Performance**-Redha Taiar 2020-06-23 Writing or managing a scientific book, as it is known today, depends on a series of major activities, such as regrouping researchers, reviewing chapters, informing and exchanging with contributors, and at the very least, motivating them to achieve the objective of publication. The idea of this book arose from many years of work in biomechanics, health disease, and rehabilitation. Through exchanges with authors from several countries, we learned much from each other, and we decided with the publisher to transfer this knowledge to readers interested in the current understanding of the impact of biomechanics in the analysis of movement and its optimization. The main objective is to provide some interesting articles that show the scope of biomechanical analysis and technologies in human behavior tasks. Engineers, researchers, and students from biomedical engineering and health sciences, as well as industrial professionals, can benefit from this compendium of knowledge about biomechanics applied to the human body.

**Nuclear Fear**-Spencer R. WEART 2009-06-30 Our thinking is inhabited by images-images of sometimes curious and overwhelming power. The mushroom cloud, weird rays that can transform the flesh, the twilight world following a nuclear war, the white city of the future, the brilliant but mad scientist who plots to destroy the world- all these images and more relate to nuclear energy, but that is not their only common bond. Decades before the first atom bomb exploded, a web of symbols with surprising linkages was fully formed in the public mind. The strange kinship of these symbols can be traced back, not only to medieval symbolism, but still deeper into experiences common to all of us. This is a disturbing book: it shows that much of what we believe about nuclear energy is not based on facts, but on a complex tangle of imagery suffused with emotions and rooted in the distant past. Nuclear Fear is the first work to explore all the symbolism attached to nuclear bombs, and to civilian nuclear energy as well, employing the powerful tools of history as well as findings from psychology, sociology, and even anthropology. The story runs from the turn of the century to the present day, following the scientists and journalists, the filmmakers and novelists, the officials and politicians of many nations who shaped the way people think about nuclear devices. The author, a historian who also holds a Ph.D. in physics, has been able to separate genuine scientific knowledge about nuclear energy and radiation from the luxuriant mythology that obscures them. In revealing the history of nuclear imagery, Weart conveys the hopeful message that once we understand how this imagery has secretly influenced history and our own thinking, we can move on to a clearer view of the choices that confront our civilization. It is a deeply serious book but written in an accessible style that reveals the culture in which this fear emerges only to be suppressed and emerge again. --Ellen Goodman, Boston Globe Reviews of this book: A historical portrait of the quintessential modern nightmare...Weart shows in meticulous and fascinating detail how [the] ancient images of alchemy-fire, sexuality, Armageddon, gold, eternity and all the rest-immediately clustered around the new science of atomic physics...There is no question that the image of nuclear power reflects a complex and deeply disturbing portrait of what it means to be human. --Stephan Salisbury, Philadelphia Inquirer Reviews of this book: A detailed, probing study of American hopes, dreams and insecurities in the twentieth-century. Weart has a poet's acumen for sensing human feelings ... Nuclear Fear remains captivating as history...and original as an anthropological study of how nuclear power, like alchemy in medieval times, offers a convenient symbol for deeply-rooted human feelings. --Los Angeles Times Reviews of this book: Weart's tale boldly sweeps from the futuristic White City of the 1893 Chicago World's Fair and the discovery of radioactivity in 1896 through Hiroshima and Star Wars... (An) admirable call for synthesis of art and science in a true transmutation that takes us beyond nuclear fear. --H. Bruce Franklin, Science

**Architecture on the Borderline**-Anoma Pieris 2019-06-25 Architecture on the Borderline interrogates space and territory in a turbulent present where nation-state borders are porous to a few but impermeable to many. It asks how these uneven and conflicted social realities are embodied in the physical and material conditions imagined, produced or experienced through architecture and urbanism. Drawing on historical, global examples, this rich collection of essays illustrates how empires, nations and cities expand their frontiers and contest boundaries, but equally how borderline identities of people and places influence or expose these processes. Empirical chapters covering Central Asia, the Asia Pacific region, the American continent, Europe and the Middle East offer multiple critical insights into the ways in which our spatial imagination is contingent on 'border-thinking'; on the ways of being and navigating frontiers, boundaries and margins, the three themes used to organise their content. The underlying premise of the book is that sensitisation to border conditions can alter our understanding of the static physical spaces that service political or cultural ideologies, and that the view from the periphery opens up new ways of understanding sovereignty. In exploring these various spaces and their transformative subjectivities, this book also reveals the unrelenting precarity of contesting and living on the margins, and related spaces and discourses that are neglected or suppressed.

**After the Dresden Bombing**-A. Fuchs 2011-11-16 Anne Fuchs traces the aftermath of the Dresden bombing in the collective imagination from 1945 to today. As a case study of an event that gained local, national and global iconicity, the book investigates the role of photography, fine art, architecture, literature and film in dialogue with the changing German socio-political landscape.

**Rubens & Brueghel**-Anne T. Woollett 2006 Truly collaborative paintings, that is, not simply mechanical but also conceptual co-productions, are rare in the history of art. This gorgeously illustrated catalogue explores just such an extraordinary partnership between Antwerp's most eminent painters of the early seventeenth century, Peter Paul Rubens (1577-1640) and Jan Brueghel the Elder (1568-1625). Rubens and Brueghel executed approximately twenty-five works together between around 1597 and Brueghel's death in 1625. Highly prized and sought after by collectors throughout Europe, the collaborative works of Rubens and Brueghel were distinguished by an extremely high level of quality, further enhanced by the status of the artists themselves. Published to coincide with an exhibition at the Getty Museum to be held July 5 to September 24, 2006, the catalogue features twenty-six color plates of such Rubens/Brueghel paintings as The Return from War, The Feast of Acheloiç½s, and Madonna and Child in a Garland of Flowers, along with Rubens and Brueghel's collaborations with important contemporaries such as Frans Snyders and Hendrick van Balen. This is the first such publication to fully address and reproduce these works in depth.

**Paul**-Gerd Ludemann New Testament scholar Gerd Lüdemann continues his exploration of the life and teachings of Paul in this groundbreaking monograph, which synthesizes the research of his four previous books on Christianity's leading apostle. As the subtitle of the present work makes clear, Lüdemann comes to the conclusion that Paul should be considered not only Christianity's most influential proselytizer but in truth deserves the title of founder of the religion that ostensibly originated with Jesus of Nazareth. Though other scholars have previously made the point that Paul's interpretation of the Christian message actually obscured the original teachings of Jesus, Lüdemann goes further. His painstaking historical research shows that Paul created the major tenets of the Christianity we know today and that his theology - an original synthesis of Hebrew and Greek belief systems - differs significantly from what we now know the historical Jesus to have preached.Based on a life-changing vision of the risen Christ, Paul naturally made his belief in the resurrection of the crucified Jesus the centerpiece of his interpretation of this new religion. But Lüdemann contends that however sincerely motivated he was, in the final analysis we must judge Paul's belief as self-deception. Paul never knew Jesus and he had only a passing acquaintance and an often-strained relationship with Jesus' apostles. As a result, he was not in a position to accurately represent Jesus' teachings. Through the accidents of history and his dynamic personality, his evangelizing efforts to the non-Jewish population of the Roman Empire succeeded, whereas the mission of other leading apostles (for example, Peter and James) to a mainly Jewish audience failed. Thus, Paul's version of Christianity, not Jesus', captured the public imagination and eventually became the dominant religion of the West. In another book, Lüdemann has called this historical accident The Great Deception. Here he shows that the deception began as self-deception within the deeply conflicted personality of Paul of Tarsus, the former Pharisee and zealous persecutor of the fledgling Christian sect whose dramatic conversion on the road to Damascus transformed him into its greatest promoter.This brilliant exegesis, based on twenty-five years of research, by a leading New Testament scholar with an unwavering commitment to historical accuracy presents a message rarely heard from any pulpit but one that churches can no longer honestly ignore.Gerd Lüdemann is a professor of the history and literature of early Christianity at the University of Göttingen, Germany. Professor Lüdemann's published conclusions about Christianity aroused great controversy in his native Germany, where the Confederation of Protestant Churches in Lower Saxony demanded his immediate dismissal from the theological faculty of his university. Despite this threat to his academic freedom, he has retained his post at the university, although the chair he holds was renamed to disassociate him from the training program of German pastors. Lüdemann is also the author of Jesus After 2000 Years, Paul: The Founder of Christianity, and The Resurrection of Christ: A Historical Inquiry.
