Catching the Process Fieldbus-James Powell 2012-09-03 Industrial communications are a multidimensional, occasionally confusing, mixture of fieldbuses, software packages, and media. The intent of this book is to make it all accessible. When industrial controls communication is understood and then installed with forethought and care, network operation can be both beneficial and painless. To that end, the book is designed to speak to you, whether you're a beginner or interested newbie, the authors guide you through the bus route to communication success. However, this is not a how-to manual. Rather, think of it as a primer laying the groundwork for controls communication design, providing information for the curious to explore and motivation for the dedicated to go further.

Programmable Devices and Systems 2001-W. Ciężyński 2002 Scientific meetings on programmable devices and systems began in 1995 with the PDS'95 event organised by the Institute of Electronics, Silesian University of Technology (SUT). Many papers on the issues of programmable devices and systems were presented at numerous conferences and workshops devoted to electronics and circuit theory yet there were no workshops devoted solely to those particular topics. Combined with the belief that some specific common problems appeared in the area of PDS justified the decision to organise the PDS meeting. The PDS2001 IFAC Workshop, organised by the Institute of Electronics, SUT, Gliwice, Poland was the 5th event in the series. The aim of the meeting was to define the future trends of this field via the interaction of industry, technical research centres and academia representatives. This Proceedings volume contains 54 duly presented papers and many of them when compared to the Preprints

volume version have been corrected and enriched with the discussion results. The papers are grouped according to the Workshop plenary sessions topics as follows: •Communication •Digital Signal Processing •Industrial Programmable Logic Controllers •Field Programmable Logic

PROFIBUS Manual-Max Felser 2012-08-09 In the last 20 years I have been personally involved with PROFIBUS: teaching it at the University, working on projects and leading workshops for industry. During this time, various descriptions and guides to different aspects of PROFIBUS were developed. I was helped in this by the contacts I had with industry and a range of experts in my capacity as chairman of PROFIBUS Switzerland and head of the PROFIBUS Competence Centre (PICC) at the Bern University of Applied Sciences. I have now brought these documents together in the form of a manual. Its purpose is to simplify entry to the world of PROFIBUS for a wider public. Now I generated an electronic book version with active links for the usage on iPad or Android tablet computers.
