Molecular Visions (Organic, Inorganic, Organometallic) Molecular Model Kit #1 by Darling Models to accompany Organic Chemistry-Darling Models 2000-04-07 Molecular models are as vital a tool for the study of chemistry as calculators are for the study of mathematics. Molecular Visions models may be assembled in infinite combinations enabling the user to construct not only familiar configurations but also undiscovered possibilities. Models are intended to inspire the imagination, stimulate thought, and assist the visualization process. They present the user with a solid form of an abstract object that can otherwise only be visualized by the chemist. While chemistry textbooks use letters and graphics to describe molecules, molecular models make them "real". MOLECULAR VISIONS Organic Kit #1 is in a green plastic box, 9"x4"x2"

Counting on Grace-Elizabeth Winthrop 2008-12-18 1910. Pownal, Vermont. At 12, Grace and her best friend Arthur must leave school and go to work as a "doffers" on their mothers' looms in the mill. Grace's mother is the best worker, fast and powerful, and Grace desperately wants to help her. But she's left handed and doffing is a right-handed job. Grace's every mistake costs her mother, and the family. She only feels capable on Sundays, when she and Arthur receive special lessons from their teacher. Together they write a secret letter to the Child Labor Board about underage children working in Pownal. A few weeks later a man with a camera shows up. It is the famous reformer Lewis Hine, undercover, collecting evidence for the Child Labor Board. Grace's brief acquaintance with Hine and the photos he takes of her are a gift that changes her sense of herself, her future, and her family's future.
