<p>The Book of Evidence-John Banville 2012-03-07 John Banville’s stunning powers of mimicry are brilliantly on display in this engrossing novel, the darkly compelling confession of an improbable murderer. Freddie Montgomery is a highly cultured man, a husband and father living the life of a dissolute exile on a Mediterranean island. When a debt comes due and his wife and child are held as collateral, he returns to Ireland to secure funds. That pursuit leads to murder. And here is his attempt to present evidence, not of his innocence, but of his life, of the events that lead to the murder he committed because he could. Like a hero out of Nabokov or Camus, Montgomery is a chillingly articulate, self-aware, and amoral being, whose humanity is painfully on display.</p>

<p>The Geographic Revolution in Early America-Martin Brückner 2012-12-01 The rapid rise in popularity of maps and geography handbooks in the eighteenth century ushered in a new geographic literacy among nonelite Americans. In a pathbreaking and richly illustrated examination of this transformation, Martin Bruckner argues that geographic literacy as it was played out in popular literary genres—written, for example, by William Byrd, George Washington, Thomas Jefferson, Royall Tyler, Charles Brockden Brown, Meriwether Lewis, and William Clark—significantly influenced the formation of identity in America from the 1680s to the 1820s. Drawing on historical geography, cartography, literary history, and material culture, Bruckner recovers a vibrant culture of geography consisting of property plats and surveying manuals, decorative wall maps and school geographies, the nation’s first atlases, and sentimental objects such as needlework samplers. By showing how this geographic revolution affected the production of literature, Bruckner demonstrates that the internalization of geography as a kind of language helped shape the literary construction of the modern American subject. Empirically rich and provocative in its readings, The Geographic Revolution in Early America proposes a new, geographical basis for Anglo-Americans’ understanding of their character and its expression in pedagogical and literary terms.</p>
<p>Mother Land-Paul Theroux 2017-05-09 “Theroux possesses a fabulously nasty sense of humor.” — Stephen King, New York Times Book Review To those in her Cape Cod town, Mother is an exemplar of piety, frugality, and hard work. To her husband and seven children, she is a selfish, petty tyrant. She excels at playing her offspring against each other. Her favorite, Angela, died in childbirth; only Angela really understands her, she tells the others. The others include the officious lawyer, Fred; the uproarious professor, Floyd; a pair of inseparable sisters whose devotion to Mother has consumed their lives; and JP, the narrator, a successful writer whose work she disparages. As she lives well past the age of one hundred, her brood struggles with and among themselves to shed her viselike hold on them. Mother Land is a piercing portrait of how a parent’s narcissism impacts a family. While the particulars of his tale are unique, Paul Theroux encapsulates with acute clarity and wisdom a circumstance that is familiar to millions of readers. “Paul Theroux ladles a steaming cup of dysfunctional-family chowder in Mother Land.” — Vanity Fair “An engrossing, emotionally tangled and often merciless examination of family and self. . . . Mother Land is a bittersweet, brutally frank family saga that offers enough redemption to make the journey worth it.” — Shelf Awareness</p>
<p>Imagined Globalization-Néstor García Canclini 2014-03-07 A leading figure in cultural studies worldwide, Néstor García Canclini is a Latin American thinker who has consistently sought to understand the impact of globalization on the relations between Latin America, Europe, and the United States, and among Latin American countries. In this book, newly available in English, he considers how globalization is imagined by artists, academics, migrants, and entrepreneurs, all of whom traverse boundaries and, at times, engage in conflicted or negotiated multicultural interactions. García Canclini contrasts the imaginaries of previous migrants to the Americas with those who live in transnational circuits today. He integrates metaphor and narrative, working through philosophical, anthropological, and socioeconomically grounded interpretations of art, literature, crafts, media, and other forms of expression toward his conclusion that globalization is, in important ways, a collection of heterogeneous narratives. García Canclini advocates global imaginaries that generate new strategies for dealing with contingency and produce new forms of citizenship oriented toward multiple social configurations rather than homogenization. This edition of Imagined Globalization includes a significant new introduction by George Yúdice and an interview in which the cultural theorist Toby Miller and García Canclini touch on events including the Arab Spring and Occupy Wall Street.</p>
<p>Teaching and Learning for the Twenty-First Century-Fernando M. Reimers 2019-01-02 This book describes how different nations have defined the core competencies and skills that young people will need in order to thrive in the twenty-first-century, and how those nations have fashioned educational policies and curricula meant to promote those skills. The book examines six countries—Chile, China, India, Mexico, Singapore, and the United States—exploring how each one defines, supports, and cultivates those competencies that students will need in order to succeed in the current century. Teaching and Learning for the Twenty-First Century appears at a time of heightened attention to comparative studies of national education systems, and to international student assessments such as those that have come out of PISA (the Program for International Student Assessment), led by the Organisation for Economic Co-operation and Development. This book’s crucial contribution to the burgeoning field of international education arises out of its special attention to first principles—and thus to first questions: As Reimers and Chung explain, “much can be gained by an explicit investigation of the intended purposes of education, in what they attempt to teach students, and in the related questions of why those purposes and how they are achieved.” These questions are crucial to education practice and reform at a time when educators (and the students they serve) face unique, pressing challenges. The book’s detailed attention to such questions signals its indispensable value for policy makers, scholars, and education leaders today.</p>
<p>The Language of Mathematics-Keith Devlin 2000-03-13 Award-winning author Keith Devlin reveals the vital role mathematics plays in our eternal quest to understand who we are and the world we live in. More than just the study of numbers, mathematics provides us with the eyes to recognize and describe the hidden patterns of life.</p>
<p>Language and Literacy in Science Educationaa-Wellington 2001-03-01 Science in secondary schools has tended to be viewed mainly as a 'practical subject', and language and literacy in science education have been neglected. But learning the language of science is a major part of science education: every science lesson is a language lesson, and language is a major barrier to most school students in learning science. This accessible book explores the main difficulties in the language of science and examines practical ways to aid students in retaining, understanding, reading, speaking and writing scientific language.</p>
<p>The Media in the Network Society-Gustavo Cardoso 2006 In the Network Society the development of a new communicational model has been taking shape. A communicational model characterized by the fusion of interpersonal communication and mass communication, connecting audiences and broadcasters under a hypertextual matrix linking several media devices. The Networked Communication model is the informational societies communication model. A model that must be understood also in its needed literacies for building our media diets, media matrixes and on how it’s changing the way autonomy is managed and citizenship exercised in the Information Age. In this book Gustavo Cardoso develops an analysis that, focusing on the last decade, takes us from Europe to North America and from South America to Asia, combining under the framework of the Network Society a broad range of scientific perspectives from Media Studies to Political Science and Social Movements theory to Sociology of Communication.</p>

The Spatial Economy-Masahisa Fujita 1999 The authors show how a common approach that emphasizes the three-way interaction among increasing returns, transportation costs, and the movement of productive factors can be applied to a wide range of issues in urban, regional, and international economics. Since 1990 there has been a renaissance of theoretical and empirical work on the spatial aspects of the economy—that is, where economic activity occurs and why. Using new tools—in particular, modeling techniques developed to analyze industrial organization, international trade, and economic growth—this "new economic geography" has emerged as one of the most exciting areas of contemporary economics. The authors show how seemingly disparate models reflect a few basic themes, and in so doing they develop a common "grammar" for discussing a variety of issues. They show how a common approach that emphasizes the three-way interaction among increasing returns, transportation costs, and the movement of productive factors can be applied to a wide range of issues in urban, regional, and international economics. This book is the first to provide a sound and unified explanation of the existence of large economic agglomerations at various spatial scales.

Postmodern Geographies-Edward W. Soja 1989 Written by one of America’s foremost geographers, Postmodern Geographies contests the tendency, still dominant in most social science, to reduce human geography to a reflective mirror, or, as Marx called it, an "unnecessary complication." Beginning with a powerful critique of historicism and its constraining effects on the geographical imagination, Edward Soja builds on the work of Foucault, Berger, Giddens, Berman, Jameson and, above all, Henri Lefebvre, to argue for a historical and geographical materialism, a radical rethinking of the dialectics of space, time and social being. Soja charts the respatialization of social theory from the still unfolding encounter between Western Marxism and modern geography, through the current debates on the emergence of a postfordist regime of "flexible accumulation." The postmodern geography of Los Angeles, exposed in a provocative pair of essays, serves as a model in his account of the contemporary struggle for control over the social production of space.

The Winning Attitude-John C. Maxwell 1996-06 Using insights from the Bible, dynamic pastor and motivational speaker Maxwell gives detailed steps for developing the attitude of mind which brings peace, courage, and success—to help turn problems into opportunities.

Towards a Theory of Schooling (Routledge Revivals)-David Hamilton 2013-09-13 First published in 1989, Towards a Theory of Schooling explores and debates the relationship between school and society. It examines the form and function of one of humankind’s most important social institutions, following the cutting edge of pedagogic innovation from mainland Europe through the British Isles to the USA. In the process, the book throws important light upon the origins and evolution of the school based notions of class, curriculum, classroom, recitation and class teaching.

The Great Depression in Latin America-Paulo Drinot 2014-08-25 Although Latin America weathered the Great Depression better than the United States and Europe, the global economic collapse of the 1930s had a deep and lasting impact on the region. The contributors to this book examine the consequences of the Depression in terms of the role of the state, party-political competition, and the formation of working-class and other social and political movements. Going beyond economic history, they chart the repercussions and policy responses in different countries while noting common cross-regional trends—in particular, a mounting critique of economic orthodoxy and greater state intervention in the economic, social, and cultural spheres, both trends crucial to the region’s subsequent development. The book also examines how regional transformations interacted with and differed from global processes. Taken together, these essays deepen our understanding of the Great Depression as a formative experience in Latin America and provide a timely comparative perspective on the recent global economic crisis. Contributors. Marcelo Bucheli, Carlos Contreras, Paulo Drinot, Jeffrey L. Gould, Roy Hora, Alan Knight, Gillian McGillivray, Luis Felipe Sáenz, Angela Vergara, Joel Wolfe, Doug Yarrington

Forest of a Thousand Lanterns-Julie C. Dao 2017-10-10 The Wrath and the Dawn meets Snow White and the Huntsman in this dark and mystical East Asian fantasy reimagining of The Evil Queen legend about one peasant girl’s quest to become Empress. “A richly developed fantasy world. . . . Julie C. Dao is a talent to watch.”—Marie Lu, #1 New York Times bestselling author of The Young Elites Eighteen-year-old Xifeng is beautiful. The stars say she is destined for greatness, that she is meant to be Empress of Feng Lu. But only if she embraces the darkness within her. Growing up as a peasant in a forgotten village on the edge of the map, Xifeng longs to fulfill the destiny promised to her by her cruel aunt, the witch Guma, who has read the cards and seen glimmers of Xifeng’s majestic future. But is the price of the throne too high? Because in order to achieve greatness, she must spurn the young man who loves her and exploit the callous magic that runs through her veins—sorcery fueled by eating the hearts of the recently killed. For the god who has sent her on this journey will not be satisfied until his power is absolute. Set in an East Asian-inspired fantasy world filled with both breathtaking pain and beauty, Forest of a Thousand Lanterns possesses all the hallmarks of masterful fantasy: dazzling magic, heartbreaking romance, and a world that hangs in the balance. Fans of Heartless, Stealing Snow, and Red Queen will devour this stunning debut. Ideology and Curriculum-Michael W. Apple 2004 To celebrate the 25th anniversary of its publication, Michael W. Apple has thoroughly updated his influential text, and written a new preface. The new edition also includes an extended interview circa 2001, in which Apple relates the critical agenda outlined in Ideology and Curriculum to the more contemporary conservative climate. Finally, a new chapter titled “Pedagogy, Patriotism and Democracy: Ideology and Education After 9/11” is also included.

Multiple Intelligences-Howard E. Gardner 2008-07-31 Howard Gardner’s brilliant conception of individual competence has changed the face of education in the twenty-three years since the publication of his classic work, Frames of Mind. Since then thousands of educators, parents, and researchers have explored the practical implications and applications of Multiple Intelligences theory—the powerfunction that there are separate human capacities, ranging from musical intelligence to the intelligence involved in self-understanding. The first decade of research on MI theory and practice was reported in the 1993 edition of Multiple Intelligences. This new edition covers all developments since then and stands as the most thorough and up-to-date account of MI available anywhere. Completely revised throughout, it features new material on global applications and on MI in the workplace, an assessment of MI practice in the current conservative educational climate, new evidence about brain functioning, and much more.

Black Skin, White Masks-Frantz Fanon 2017-05-09 Black Skin, White Masks is a classic, devastating account of the dehumanising effects of colonisation experienced by black subjects living in a white world. First published in English in 1967, this book provides an unsurpassed study of the psychology of racism using scientific analysis and poetic grace.Franz Fanon identifies a devastating pathology at the heart of Western culture, a denial of difference, that persists to this day. A major influence on civil rights, anti-colonial, and black consciousness movements around the world, his writings speak to all who continue the struggle for political and cultural liberation.With an introduction by Paul Gilroy, author of There Ain't No Black in the Union Jack.
