Research in Secondary Schools -Thomas E. Scruggs 2004 Secondary education of students with learning and behavioral disabilities is an issue of great importance. Unlike elementary schools, secondary schools require substantially more independent functioning, assume the effective use of student planning and study skills, and often lack the classes in basic skills needed by some learners. Further, new developments in state high-stakes testing have increased the demands on content knowledge, and have decreased the availability of vocationally oriented programs. In this volume, several topics of relevance to secondary schools are considered by leading scholars, in reviews of recent research and new investigations with original data. Included in the volume are reviews of recent research on the efficacy of self-management techniques; the utility and efficacy of homework assignments; treatments for secondary students with autism; interventions on content-area learning, including English, science, math, and social studies; the effects of teacher licensure on teaching competence; dynamic assessment of working memory; and uses of technology in secondary education programs for students with learning and behavioral disabilities. In addition, original research is presented in areas of problem solving in algebra; effectiveness of co-teaching in secondary classrooms; and the interaction of depression and self-regulation. This book is intended for interested professionals and practitioners; researchers in learning and behavioral disabilities; and graduate students in psychology, education, and special education, particularly those concerned with the issues of learning and behavior problems in secondary schools.
Americans All -Darlene J. Sadlier 2012-12-01 Cultural diplomacy—"winning hearts and minds" through positive portrayals of the American way of life—is a key element in U.S. foreign policy, although it often takes a backseat to displays of military might. Americans All provides an in-depth, fine-grained study of a particularly successful instance of cultural diplomacy—the Office of the Coordinator of Inter-American Affairs (CIAA), a government agency established by President Franklin D. Roosevelt in 1940 and headed by Nelson A. Rockefeller that worked to promote hemispheric solidarity and combat Axis infiltration and domination by bolstering inter-American cultural ties. Darlene J. Sadlier explores how the CIAA used film, radio, the press, and various educational and high-art activities to convince people in the United

States of the importance of good neighbor relations with Latin America, while also persuading Latin Americans that the United States recognized and appreciated the importance of our southern neighbors. She examines the CIAA's working relationship with Hollywood's Motion Picture Society of the Americas; its network and radio productions in North and South America; its sponsoring of Walt Disney, Orson Welles, John Ford, Gregg Toland, and many others who traveled between the United States and Latin America; and its close ties to the newly created Museum of Modern Art, which organized traveling art and photographic exhibits and produced hundreds of 16mm educational films for inter-American audiences; and its influence on the work of scores of artists, libraries, book publishers, and newspapers, as well as public schools, universities, and private organizations.

Growing Readers-Kathy Collins 2004-01-01 Primary-grade teachers face an important challenge: teaching children how to read while enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In Growing Readers, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini-lessons and reading conferences. There are also four "Getting Ready" sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include: print and comprehension strategies; reading in genres such as poetry and nonfiction; connecting in-school reading and out-of-school reading; developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read, and we want them to love to read. To do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in Growing Readers create the kind of primary classrooms where that happens.
