Sufi Martyrs of Love-C. Ernst 2016-04-30 Sufism is a religion which emphasizes direct knowledge of the divine within each person, and meditation, music, song, and dance are seen as crucial spiritual strides toward attaining unity with God. Sufi paths of mysticism and devotion, motivated by Islamic ideals, are still chosen by men and women in countries from Morocco to China, and there are nearly one hundred orders around the world, eighty of which are present and thriving in the United States. The Chishti Sufi order has been the most widespread and popular of all Sufi traditions since the twelfth-century. Sufi Martyrs of Love offers a critical perspective on Western attitudes towards Islam and Sufism, clarifying its contemporary importance, both in the West and in traditional Sufi homelands. Finally, it provides access to the voices of Sufi authorities, through the translation of texts being offered in English for the first time.

Islamic International Law-Khaled Ramadan Bashir 2018-10-26 Through the analysis of Al-Shaybani's most prolific work As-Siyar Al Kabier, this book offers a unique insight into the classic Islamic perspective on international law. Despite being recognised as one of the earliest contributors to the field of international law, there has been little written, in English, on Al-Shaybani's work; this book will go some way towards filling the lacuna. International Islamic Law examines Al-Shaybani's work alongside that of other leading scholars such as: Augustine, Gratian, Aquinas, Vitoria and Grotius, proving a full picture of early thinking on international law. Individual chapters provide discussion on Al-Shaybani's writing in relation to war, peace, the consequences of war and diplomatic missions. Khaled Ramadan Bashir uses contemporary international law vocabulary to enable the reader to consider Al-Shaybani's writing in a modern context.This book will be a useful and unique resource for scholars in the field of Islamic International Law, bringing together and translating a number of historical sources to form one accessible and coherent text. Scholars researching the historical and jurisprudential origins of public international law topics, such as: international humanitarian law, 'just war', international dispute resolution, asylum and diplomacy will also find the book to be an interesting and valuable text.

ARITHMETIC: SUBJECTIVE AND OBJECTIVE FOR COMPETITIVE EXAMINATIONS-R. S. Aggarwal 1998

Early Islam and the Birth of Capitalism-Benedikt Koehler 2014-06-17 Early Islam and the Birth of Capitalism proposes a strikingly original thesis—that capitalism first emerged in Arabia, not in late medieval Italian city states as is commonly assumed. Early Islam made a seminal but largely unrecognized contribution to the history of economic thought; it is the only religion founded by an entrepreneur. Descending from an elite dynasty of religious, civil, and commercial leaders, Muhammad was a successful businessman before founding Islam. As such, the new religion had much to say on trade, consumer protection, business ethics, and property. As Islam rapidly spread across the region so did the economic teachings of early Islam, which eventually made their way to Europe. Early Islam and the Birth of Capitalism demonstrates how Islamic institutions and business practices were adopted and adapted in Venice and Genoa. These financial innovations include the invention of the corporation, business management techniques, commercial arithmetic, and monetary reform. There were other Islamic institutions assimilated in Europe: charties, the waqf, inspired trusts, and institutions of higher learning; the madrasas were models for the oldest colleges of Oxford and Cambridge. As such, it can be rightfully said that these essential aspects of capitalist thought all have Islamic roots.

Researchers and students in the field will find answers to questions surrounding these intertwined and compelling fields.

Thinking and Reasoning-Ken Manktelow 2012 The area of psychological research reviewed in this book is one that is not only increasing in popularity in college curricula, but is also making an ever larger impact on the world outside the classroom. Drawing upon research originally cited in Ken Manktelow's highly successful publication Reasoning and Thinking, this completely rewritten textbook reflects on the revolutionary changes that have occurred in the field in recent years, stemming from the huge expansion in research output, as well as new methods and explanations, and the appearance of numerous books on the subject aimed at the popular market. The main areas covered are probability judgment, deductive and inductive reasoning, decision making, hypothetical thinking and rationality. In each case, the material is almost entirely new, with topics such as the new paradigm in reasoning research, causal reasoning and counterfactual thinking appearing for the first time. The book also presents an extended treatment of decision making research, and contains a chapter on individual and cultural influences on thinking. Thinking and Reasoningprovides a detailed, integrated and approachable treatment of this area of cognitive psychology, and is ideal reading for intermediate and advanced undergraduate students; indeed, for anyone interested in how we draw conclusions and make choices.

The Qur'an and Normative Religious Pluralism-Arif Kemil Abdullah In a multi-faith world, Islam is widely regarded as dogmatic and exclusivist. Yet in the Qur'an we have a great and worthy example of how to live in diversity, of powerful scriptural tenets that lend themselves precisely to engagement with those of other faiths. As such Islam has much to add to the debate on Religious Pluralism. For Muslims the issue is a delicate one. Aside from being tolerant and respectful of other faiths, advocating freedom of faith, and peaceful coexistence for all humanity, Muslims have to intellectually engage on matters of religious truth whilst defending the validity of their own Islamic tenets. This study is focused on the Qur'anic text. It explores the Qur'anic conception of normative religious pluralism with a view to providing answers to questions such as whether the Qur'an itself regards normative religious pluralism as a value system or simply a method through which the Qur'anic world view can be actualized. In doing so the author corrects some highly controversial misquoted, mistranslated, and/or quoted out of context verses of the Qur'an, including the so-called verse of the sword and the perception of not taking non-Muslims as friends. In reality, the Qur'an calls for freedom of faith and peaceful coexistence, but condemns oppression, religious persecution, and those who initiate hostilities. In this way it not only invokes human dignity, but restores it when it is violated.

ICIEPEG 2014-Mariyamni Awang 2016-10-13 This book presents the proceedings of the 3rd International Conference on Integrated Petroleum Engineering and Geosciences 2014 (ICIEPEG2014). This book will be a bridge between engineers, geoscientists, academicians and industry.

Religion and the Making of Nigeria-Olufemi Vaughan 2016-11-18 In Religion and the Making of Nigeria, Olufemi Vaughan examines how Christian, Muslim, and indigenous religious structures have provided the essential social and ideological frameworks for the construction of contemporary Nigeria. Using a wealth of archival sources and extensive Africanist scholarship, Vaughan traces Nigeria's social, religious, and political history from the early nineteenth century to the present. During the nineteenth century, the historic Sokoto Jihad in today's northern Nigeria and the Christian missionary movement in what is now southwestern Nigeria provided the frameworks for ethno-religious divisions in colonial society. Following Nigeria's independence from Britain in 1960, Christian-Muslim tensions became manifest in regional and religious conflicts over the expansion of sharia, in fierce competition among political elites for state power, and in the rise of Boko Haram. These tensions are not simply conflicts over religious beliefs, ethnicity, and regionalism; they represent structural imbalances founded on the religious divisions forged under colonial rule.

Adolf Hitler-Mamta Sharma Chuge 2012-08-01 Adolf Hitler is often held responsible for more evil and suffering than any man in history. Hitler was unstoppable ... the more one delves into Hitler's life, the more complex it appears. Many myths shroud his life. His name inspired both admiration and dread, turning into a symbol of strength. Hitler believed that no other people as much as the German race had the right to control the world and was aware that this ambitious goal could not be achieved without warfare. Often held responsible for more - The chant of hail Hitler - became commonplace in rallies as well as verbal written communication. There were many sides to Hitler, often not accessible to public. Emerging as a universal spirit, the Fuhrer almost invariably managed to generate strong feelings; the ripples are felt even today...
