Islamic International Law-Khaled Ramadan Bashir 2018-10-26 Through the analysis of Al-Shaybani's most prolific work As-Siyar Al Kabier, this book offers a unique insight into the classic Islamic perspective on international law. Despite being recognised as one of the earliest contributors to the field of international law, there has been little written, in English, on Al-Shaybani's work; this book will go some way towards filling the lacuna. International Islamic Law examines Al-Shaybani's work alongside that of other leading scholars such as: Augustine, Gratian, Aquinas, Vitoria and Grotius, proving a full picture of early thinking on international law. Individual chapters provide discussion on Al-Shaybani's writing in relation to war, peace, the consequences of war and diplomatic missions. Khaled Ramadan Bashir uses contemporary international law vocabulary to enable the reader to consider Al-Shaybani's writing in a modern context. This book will be a useful and unique resource for scholars in the field of Islamic International Law, bringing together and translating a number of historical sources to form one accessible and coherent text. Scholars researching the historical and jurisprudential origins of public international law topics, such as: international humanitarian law, 'just war', international dispute resolution, asylum and diplomacy will also find the book to be an interesting and valuable text.

Early Islam and the Birth of Capitalism-Benedikt Koehler 2014-06-17 Early Islam and the Birth of Capitalism proposes a strikingly original thesis—that capitalism first emerged in Arabia, not in late medieval Italian city states as is commonly assumed. Early Islam made a seminal but largely unrecognized contribution to the history of economic thought; it is the only religion founded by an entrepreneur. Descending from an elite dynasty of religious, civil, and commercial leaders, Muhammad was a successful businessman before founding Islam. As

such, the new religion had much to say on trade, consumer protection, business ethics, and property. As Islam rapidly spread across the region so did the economic teachings of early Islam, which eventually made their way to Europe. Early Islam and the Birth of Capitalism demonstrates how Islamic institutions and business practices were adopted and adapted in Venice and Genoa. These financial innovations include the invention of the corporation, business management techniques, commercial arithmetic, and monetary reform. There were other Islamic institutions assimilated in Europe: charities, the waqf, inspired trusts, and institutions of higher learning; the madrasas were models for the oldest colleges of Oxford and Cambridge. As such, it can be rightfully said that these essential aspects of capitalist thought all have Islamic roots.

The Book of Promethea-Häl_ne Cixous 1991-01-01 In writing *Le Livre de Promethea* Häl_ne Cixous set for herself the task of bridging the immeasurable distance between love and language. She describes a love between two women in its totality, experienced as both a physical presence and a sense of infinity. The result is a stunning example of *Pécriture* feminine that won kudos when published in France in 1983. Its translation into English by Betsy Wing will extend the influence of a writer already famous for her novels and contributions to feminist theory. In her introduction Betsy Wing notes the contemporary emphasis on "fictions of presence." Cixous, in *The Book of Promethea*, works to "repair the separation between fiction and presence, trying to chronicle a very-present love without destroying it in the writing."

Men of Capital-Sherene Seikaly 2015-11-18 *Men of Capital* examines British-ruled Palestine in the 1930s and 1940s through a focus on economy. In a departure from the expected histories of Palestine, this book illuminates dynamic class constructions that aimed to shape a pan-Arab utopia in terms of free trade, profit accumulation, and private property. And in so doing, it positions Palestine and Palestinians in the larger world of Arab thought and social life, moving attention away from the limiting debates of Zionist-Palestinian conflict. Reading Palestinian business periodicals, records, and correspondence, Sherene Seikaly reveals how capital accumulation was central to the conception of the ideal "social man." Here we meet a diverse set of characters—the man of capital, the frugal wife, the law-abiding Bedouin, the unemployed youth, and the abundant farmer—in new spaces like the black market, cafes and cinemas, and the idyllic Arab home. Seikaly also traces how British colonial institutions and policies regulated wartime austerity regimes, mapping the shortages of basic goods—such as the vegetable crisis of 1940—to the broader material disparities among Palestinians and European Jews. Ultimately, she shows that the economic is as central to social management as the political, and that an exclusive focus on national claims and conflicts hides the more complex changes of social life in Palestine.

Religion and the Making of Nigeria-Olufemi Vaughan 2016-11-18 In *Religion and the Making of Nigeria*, Olufemi Vaughan examines how Christian, Muslim, and indigenous religious structures have provided the essential social and ideological frameworks for the construction of contemporary Nigeria. Using a wealth of archival sources and extensive Africanist scholarship, Vaughan traces Nigeria's social, religious, and political history from the early nineteenth century to the present. During the nineteenth century, the historic Sokoto Jihad in today's northern Nigeria and the Christian missionary movement in what is now southwestern Nigeria provided the frameworks for ethno-religious divisions in colonial society. Following Nigeria's independence from Britain in 1960, Christian-Muslim tensions became manifest in regional and religious conflicts over the expansion of sharia, in fierce competition among political elites for state power, and in the rise of Boko Haram. These tensions are not simply conflicts over religious beliefs, ethnicity, and regionalism; they represent structural imbalances founded on the religious divisions forged under colonial rule.

History of Modern India-Bipan Chandra 2009 *History of Modern India* presents an authoritative overview of the history of what was known as British India. The text is largely based on the author's research on nationalism and colonialism in India and also draws from the works of eminent historians of the period. Challenging and revising colonial and nationalist interpretations of history, this book moves away from a largely political narrative to a social, economic and religious history of modern India. It explains how conditions in India during the eighteenth century helped the British East India Company establish its rule in India. It also gives us important insights into the primary aim of colonial rule which was the economic exploitation of India through trade and investment. The

topics are arranged thematically in order to showcase the various forces that went into the making of independent India. However, in the entire arrangement of themes, the chronology of the period is enmeshed innovatively with the various forces that evolved both as a cause and effect of British imperialist rule of the subcontinent. The book also provides a detailed account of the nationalist movement and introduces us to the contributions of different individuals who were behind the nationalist movement. A comprehensive textbook for students of history and

interested readers, History of Modern India is essential reading for a broad based understanding of the making of modern India.
