A Cultural History of Hair in Antiquity-Mary Harlow 2020-12-10 Hair, or lack of it, is one the most significant identifiers of individuals in any society. In Antiquity, the power of hair to send a series of social messages was no different. This volume covers nearly a thousand years of history, from Archaic Greece to the end of the Roman Empire, concentrating on what is now Europe, North Africa, and the Near East. Among the key issues identified by its authors is the recognition that in any given society male and female hair tend to be opposites (when male hair is generally short, women's is long); that hair is a marker of age and stage of life (children and young people have longer, less confined hairstyles; adult hair is far more controlled); hair can be used to identify the 'other' in terms of race and ethnicity but also those who stand outside social norms such as witches and mad women. The chapters in A Cultural History of Hair in Antiquity cover

the following topics: religion and ritualized belief, self and society, fashion and adornment, production and practice, health and hygiene, gender and sexuality, race and ethnicity, class and social status, and cultural representations.

Mosby's Fundamentals of Therapeutic Massage-Sandy Fritz 2000 "This revised version of the book examines touch as a form of communication and with great insight has expanded on the importance of those offering these forms of care being able to recognize the ways in which touch therapies can be interpreted. It is vital for massage therapists to understand touch in the context of the client's life and beliefs, culture, age, gender, religion, and health status in order that delivery may be sensitively offered and accepted. Ethics receives a justifiably expanded degree of attention in the text, accurately reflecting both the profession's own increased focus on the important topic and society's demand for excellence in the ethical arena.
